**FROM: CORE.NV Executive Committee**

**SUBJECT: New Enterprise Resource Planning Solution**

Dear State Employees,

We are pleased to announce that the Board of Examiners approved a new Enterprise Resource Planning (ERP) vendor contract today for the CORE.NV project. The vendor for the CORE.NV project chosen is CGI Technologies and Solutions, Inc. The CGI Advantage® 4 system will replace our current legacy systems, which are outdated and no longer meet our needs, as recent challenges have reminded us. The new system will provide us with a single, integrated cloud-based platform. This will allow us to streamline our processes, reduce costs, improve data security, increase efficiency and productivity, and make better decisions.

Advantage® 4 is a software system that will integrate all of the core business processes for the state; Finance, HR, and other operations. CGI Technologies and Solutions, Inc. are the leaders in state and local government ERP systems. The state has already been utilizing older versions of Advantage® since 1999.

The implementation of the new CORE.NV project will be a phased approach, focusing on minimal viable products first with the first phase live by January 1, 2025. We will be providing regular updates on the project as it progresses.

CORE.NV will be a complex project, but we are confident that it will be successful. The Office of Project Management has a dedicated new team of project managers who will be working with us throughout the entire project.

We appreciate your patience and cooperation as we work to implement this important mission.

For Questions, please contact the CORE.NV Office of Project Management or visit our website.

Thank you for your support.
